#### **DETAILED ACTION**

## Election/Restriction

1. Applicant's election without traverse of Group III (claims 1, 2, 7-11 and 13) in the response filed May 21, 2002 (paper no. 9) is acknowledged. Non-elected claims 3-6 and 12 have been canceled by applicant.

## Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### Information Disclosure Statement

3. The information disclosure statement filed April 20, 2001 (paper no. 6) has been received and the references listed thereon have been considered.

#### Oath/Declaration

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

• .

Application/Control Number: 09/667,836

Art Unit: 3724

The oath or declaration is defective because:

the priority information is incomplete for the second and third documents.

### **Drawings**

5. The drawings are objected to because of the following informalities:

In Figure 6, numeral 46A appears to be inaccurate, and it seems that it should be changed to --46B-- or the like.

In Figures 20 and 23, numeral 23" appears to be inaccurate, and it seems that it should be changed to --23'-- or the like.

In Figure 24, a separate Figure label should be provided for each separate figure, and it is suggested to simply insert "A", "B" and "C" under each figure.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Specification

6. The disclosure is objected to because of the following informalities:

On page 7, line 15, it seems that "Fig. 10 shows" should be changed to --Figs. 10A-C show-- should be inserted after "10"; in line 18, it seems that "Fig. 17 shows" should be changed to --Figs. 17A-D show-- or the like; in line 22, "shows" should read --show--.

Art Unit: 3724

On page 8, line 3, the recitation "Figs. 24A and 24B shows" is inaccurate and improper, and it seems that it should be changed to --Figs 24 A-C show-- or the like; in line 16, it seems that "shows" should read --show--; in line 18, --1-- should be inserted after "apparatus" for clarity.

On page 9, lines 15-16, "and oblique downwards" is awkwardly worded and unclear as to what is being described; in line 16, it seems that --second-- should be inserted before "baffle" or the like for clarity; in line 20, "are formed" renders the phrase awkward, and it seems that it should be changed to --form-- or the like.

On page 10, line 12, "23" appears to be inaccurate, and it seems that it should be changed to --31--; in line 15, "with respect to Fig. 4" is vague as to what it refers, and it is suggested to delete "with respect to Fig. 4" and reinsert it in line 14 after "clockwise"; in line 16, "are formed" should read --form--; in line 19, "a fixer" is unclear as to what it refers.

On page 11, line 19, "are formed" should read --form--; in line 20, "rod" is misspelled; in line 2, it seems that "that" should be deleted; in line 23, the phrase "are moved separately" is unclear and confusing, and it seems that it should read --to be moved apart-- or the like.

On page 12, line 2, "that" should be deleted, and "are moved closely" is unclear, and it seems that it should read --to be moved toward each other--; in line 8, "detailed described" is unclear; in line 11, "and fallen on" is unclear.

Art Unit: 3724

On page 13, line 2, "is fallen" should read --falls--; in line 7, a word (e.g., on) is missing after "downwards"; in line 13, --each other-- should be inserted after "towards"; in line 18, "a" should read --an--.

Pages 14-22 contain numerous similar informalities and should be reviewed.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

7. Claims 1, 2, 7-11 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 1, "tablet conveying device" appears to be inaccurate with respect to what is being set forth in the claim; in line 5, structural cooperation is lacking for "an oblique plate", particularly with respect to the arranging device.

In claim 2, line 4, structural cooperation is lacking for "an arranging device"; in line 6, structural cooperation is lacking for "an oblique plate"; in line 8, structural cooperation is lacking for "a shutter"; in line 9, structural cooperation is lacking for "a retainer device"; in line 11, structural cooperation is lacking for "a conveying device".

In claim 10, line 3, structural cooperation is lacking for "a rotary blade"; in line 4, structural cooperation is lacking for "an arranging device"; in line 6, structural cooperation is

Application/Control Number: 09/667,836 Page 6

Art Unit: 3724

lacking for "a retainer device"; in line 9, structural cooperation is lacking for "a conveying device".

In claim 11, line 3, structural cooperation is lacking for "a rotary blade"; in line 4, structural cooperation is lacking for "an arranging device"; in line 6, structural cooperation is lacking for "a modification device"; in line 9, structural cooperation is lacking for "a retainer device"; in line 12, structural cooperation is lacking for "a conveying device".

In claim 13, line 2, structural cooperation is lacking for "a blade"; in line 3, structural cooperation is lacking for "an arranging device"; in line 5, structural cooperation is lacking for "an oblique plate"; in line 7, structural cooperation is lacking for "a shutter"; in line 9, structural cooperation is lacking for "a retainer device"; in line 12, structural cooperation is lacking for "a conveying device"; in lines 14-15, the recitation "wherein the retainer device is expanded ..." is vague and indefinite since sufficient structure has not been set forth to perform such a function.

#### Prior Art

- 8. Further consideration of the claimed invention with respect to the prior art will be given upon clarification of the claimed invention.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

Application/Control Number: 09/667,836 Page 7

Art Unit: 3724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3579; informal/draft papers - (703)305-9835.
